

## Why choose Omega?

We know you have many choices when it comes to finding the right tutoring center for your child. We also recognize that skill gaps often go undetected until grades fall. Omega provides a comprehensive solution through our nationally recognized academic assessment and customized tutoring programs. Omega Learning® founders methodically created a superior tutoring system, inclusive of the following differentiating factors:

- Certified teachers
- AdvancED accredited nationwide
- Proprietary supplemental curriculum, **Outpace®**
- Proprietary SAT/ACT\* curriculum, **Outpace® Prep**
- Communication from tutor to parents and schoolteachers
- Community Partnership commitment
- Intuitive **AIM Tutoring System®**
- Validated program academic growth: 2.2 years

## How does Omega recognize my student's needs?

Omega offers a dynamic, comprehensive solution. We use **Woodcock Johnson IV Tests of Achievement**—a nationally recognized, method of assessment also used by the public school system. This assessment is a tool that helps us identify skill gaps in specific academic areas within math and reading. Omega also administers our exclusive learning style assessment, **MyStudyStyle®** that determines your student's primary learning style.

## How much improvement can I expect with my program?

Omega students' average academic growth is 2 years and 2 months after completing our 95-hour program. We base our academic growth statistics on our students' WJIV pre- and post-program assessments. Although every student learns at their own pace, an increased self-confidence is often witnessed early in the program.

## How will I know if Omega's program is making a difference?

Your student will have the same tutor each week and they provide daily feedback to parents and schoolteachers. Omega's focus on communication with your student's "academic team" creates a clear instructional plan, encourages reciprocal communication, and exponentially increases your student's academic growth.

## What happens in a tutoring session?

Omega understands that each student is unique and as such, our customized program includes the following five key objectives: remediation, homework, test preparation, study skills, and enrichment. Omega's proprietary curriculum, **Outpace®**, provides our tutors with enrichment-based supplemental teaching resources that complement your student's school curriculum and accelerate academic growth.

## How much does it cost?

Omega's services are affordable. (See price card) We offer two payment options: Monthly and Program Prepay.

## Do you help with homework? What about skill gaps?

**Yes. Omega tutors are provided with your student's program emphasis, as recommended in your initial parent conference.** They are also provided with your WJIV and MyStudyStyle® assessments (if applicable). Omega tutors help students complete weekly homework and solidify core academic concepts, performing remediation when needed. Our tutors also have access to our proprietary supplemental curriculum, *OutpAce*® to solidify core academic concepts.

## What are your tutor qualifications?

**Omega tutors are certified, motivated teachers who care about your student's success.** Many of our instructors also have master's degrees, special education degrees, gifted certifications, and experience with multi-sensory instruction. Omega Learning® Center tutors must also complete handbook, video, and peer-to-peer training.

## What curriculum does Omega use?

**Our tutors use a combination of your student's school curriculum and Omega's supplemental, enrichment-based curriculum, *OutpAce*®, which is aligned with national standards.** Omega's certified teachers use a combination of auditory, visual, and tactile teaching resources to accommodate all learning styles.

## How long is a tutoring session? How many hours a week?

**Tutoring sessions are 1-2 hours in length. Students attending 3-4 hours per week see the best results.** Tutoring is available Monday through Thursday evenings and Saturday mornings. Omega works with your schedule to accommodate your student's needs and academic goals.

## How long is the entire Omega program?

**Our comprehensive Math and Reading programs are each 95 hours in length.** These programs have been proven effective in achieving academic goals with lasting results.

## When are payments due?

**Payments are due on the first of each month.** Your monthly payments are based on your agreed upon program schedule. Our center is aligned with the county's public school district calendar for major holidays.

## What teaching materials do your tutors use?

**Our tutors combine your school curriculum with our supplemental *OutpAce*® curriculum.** By using a combination of instructional materials, our tutors can fill skill gaps, help with school homework, and increase classroom performance. Our programs include all reading and math school subjects, including AP and Honors courses.

## Is the program guaranteed?

**Yes.** After completing your recommended 95-hour math or reading program, if your student does not achieve one year academic growth in your program emphasis (comprehension or calculation), then you will receive fifteen hours of free tutoring.
