Crack-the-Code™ founders created a fun and educational after-school program, where students advance critical-thinking skills, through action-packed team activities. For the 2019 Fall semester, Seven Hills children will meet at the clubhouse and decipher clues each week to solve "The Case of the Pirates of Cartagena."

Kids love solving clues and communicating in secret codes, so your child is sure to be ecstatic about this ground-breaking new after-school program. Kids work in small groups, using only the items found in their Clues Crate. Team activities include cipher decoding, fingerprint, tire track, and DNA analysis, as well as captivating lessons in geography and vocabulary. Our experienced and nurturing Crack-the-Code™ Coaches lead the kids through the adventures! Crack-the-Code™ is an AdvancED Accredited program offered by Omega Learning® Center Franchisor.

Crack-the-Code™ Reviews:

"Parents want to unplug their kids from technology for an hour of imaginative play after school. Crack-the-Code™ prepares kids with a strong foundation of problem-solving skills they can apply to 21st Century challenges." Public School Teacher

"My daughter met new friends and had so much fun exploring science and social studies through fun group activities." CTC Parent

"My son's favorite part was the fingerprint and DNA analysis. He learned new vocabulary words and now has a real interest in science." CTC Parent

"My child learned the importance of both group collaboration and independent thinking." CTC Parent
