

Closing the Learning Gap

The 2020-2021 school year has been unlike any other. Distance learning limited on-campus classes and periodic classroom quarantines have all impacted the learning experience for your student. Despite the challenges they have faced, students advancing to the next grade in the fall will still be expected to have mastered material taught this school year. That's where Omega Learning® can help. Our Grade-Level and Math/Science Summer Bridge Programs are designed to close the learning gap and position your student to succeed in the coming school year.

Grade-Level Readiness

Omega Learning® Center's Grade-Level Readiness program primarily targets **elementary students** who will be advancing a grade level in the fall. Leveraging Omega Learning® Center's benchmark-driven OutpAce® curriculum, Omega's certified teachers will work with your elementary student to identify and close learning gaps in reading, writing and math.

Math/Science Readiness

Middle and High School students moving on to the next level math or science course in the fall will face additional challenges. They will be expected to apply skills they should have mastered this school year. Omega Learning® Center's deep subject matter expertise and individualized approach to teaching will help your student close those knowledge gaps. Our instructors will also preview material your student will be seeing at the next level.

Summer Program Packages:

16
Hour

*(\$80 savings)**

24
Hour

*(\$120 savings)**

New Student Registration Fee: \$75

Onetime lifetime fee per student

(Summer Program Rates are valid May 1st - July 31st 2021)
